\* Important note: for purposes of comparison, the Company advises that it started operations in April 2013 and that its contractual tariff is highly seasonal (lower in October to March and higher in April to September). Therefore, while revenues for the year ended 31 December 2014 (12 months of operations) are higher than 2013 (9 months of operations), the net profit is lower due to a blend of low and high tariffs (2014 was affected by six months of low winter tariff while 2013 included three months impact) and further due to the one-off settlement of liquidated damages under the EPC Contract in 2013.
